JOURNAL OF CARIBBEAN ENVIRONMENTAL SCIENCES AND RENEWABLE ENERGY

ANNUAL REPORT 2019

A look back at the work CESaRE has done this year and a preview of what we have in store for the coming year

MESSAGE FROM THE DIRECTORS

Another year in the books!

With 2019 behind us, we have so much to be grateful for as we look back on all the ways CESaRE has grown and developed.

CESaRE continues to strive ahead as an innovative and modern academic Journal and organization. This year we lauched our Podcast Series, **CESaRE Voices**, a way to connect industry professionals and academics with one another and with a wider audience on the grounds of current scientific research and developments going on around the world. Five podcast episodes were completed this year, discussing and addressing a range of different topics.

A great success!

This year also saw the introduction of our **Minute Brief** series, a way to connect the general public with developments happening currently in the field of science, technology and renewable energy in the Caribbean. With over 20 episodes completed since the start of the year, CESaRE'S Minute Briefs were a great success and will definitely be returning in 2020.

CESaRE's Webinar Series was successfully launched, with 3 full webinars now completed. We also published our very first online magazine series, **CESaRE Impacts** where we worked with Caribbean journalists in the Environmental Sciences and Renewable Energy sectors.

Thanks to the CESaRE interns, everyone involved and everyone that has worked with us this year. We are so grateful for the chance to grow alongside industry professionals and to connect with our audience in new and exciting ways.

See you in 2020!

The Managing Directors, The Journal of CESaRE

CESaRE VOICES PODCAST SERIES

Our Podcast Series, CESaRE Voices, was launched this year and we now have 5 official episodes under our belt! These episodes of Voices seat you right at the table with leading academic, NGOs and industry visionaries across the Caribbean, discussing the important issues. And we are just getting started.

Look out for more episodes in 2020!

2019 Voices Episodes

- Ep. 1 "Environmental Economics and Agriculture"
- Ep. 2 "Is Caribbean Academia Doing Enough?"
- Ep. 3 "Will Electric Vehicles Change the Caribbean?"
- Ep. 4 "How Can the Caribbean Improve Knowledge Sharing?"
- Ep. 5 "What Do We Mean By Effective Policy?"

WEBINAR SERIES

Our Webinar Series was launched in full effect this year and throughout 2019, CESaRE has curated 3 complete webinars, with the episode titles shown below:

Ep. 1 - "Big Data and Energy"

Ep. 2 - "Are We Doing Enough?"

Ep. 3 - "Knowledge Sharing in the Caribbean"

These webinars featured discussions amongst the leading experts in industries across the Caribbean. The episodes can be accessed and viewed at any time through our CESaRE YouTube channel or you can find them at our website at the link below.

MINUTE BRIEFS

In 2019, CESaRE launched its "Minute Brief" series of bi-weekly videos, aimed at highlighting the latest news and research coming out of the Caribbean region, as they happen. Innovative projects and work in the environmental sciences and renewable energy were explored each week and packed conveniently into one minute-long, easy to absorb mobile videos. Here are some of the Minute Briefs that we released this year:

Marine Economics

Solar Power

Wind Power

Coastal Developments

Agriculture

Sustainable Fisheries

Alternative Renewable Energy

Mangrove Forests

Wildlife Conservation

Embodied Energy

If you want to see our complete list of Minute Briefs, they are available at the link below:

CESARE IMPACTS

This year, CESaRE Impacts, CESaRE's very first online magazine series, was published, where we worked with different Caribbean journalists in the Environmental Sciences and Renewable Energy sectors.

Our first issue featured articles from numerous authors, including a feature article from director and co-founder of Solar Head of State, James Ellsmore.

Click the link below to access the first issue of CESaRE Impacts.

shands around the world late or specific challenges in the development.
