THE JOURNAL OF CARIBBEAN ENVIRONMENTAL SCIENCES AND RENEWABLE ENERGY

Annual Report 2020

A Year of Balance

Message from the Directors

The year 2020 was one of the most trying years that the world had experienced in recent memory. The global pandemic created a monumental obstacle for everyone. Despite this, CESaRE continued to strive for continued progress through an already difficult year. This year provided us with a chance to reflect closely on our achievements, both past and future, to develop a balance among all the systems that make up CESaRE and to strive ahead with our vision always at the forefront.

Our podcast series, **CESaRE Voices**, continued with **6 new episodes** released this year, where guests discussed policy in the Caribbean as well as the resilience of the region during the pandemic. **CESaRE's Webinar Series** held **3 new webinars** this year. We continued our series of **Minute Briefs**, with **16 new episodes** completed since the start of the year.

CESaRE's publication series continued this year with the third issue of **CESaRE Impacts** released in September and Volume 3 of the **CESaRE Journal: The Open Issue** was released in October. Both publications featured academic articles with topics ranging from sustainable futures for the Caribbean and the impact of Covid-19 on global food security, to building small island developing states in the region to counteract disaster risk assessment. We also launched our **"Keep the Change"** campaign this year.

A very special thank you to the Board of Advisors, CESaRE interns and everyone involved that has worked with us this year. The CESaRE team continues to be forever grateful for the chance to grow and develop and we promise to keep striving for the perfect balance of all our systems.

We look forward to 2021 with hope!

The Managing Directors,
The Journal of CESaRE

CESaRE Impacts
September Issue

5
Author Submissions
